

Text Enhance is a malware that pops up advertising without knowledge of site owner.

Here is a sample where the site is coded to display.

we accept major credit card

When your computer is infected with Text Enhanced malware it displays like

we accept major credit card

When I hover mouse over “credit card” it show

we accept major credit card

Click to Continue > by Text-Enhance

If I click on “credit card” it will pop up an unwanted Ad.

Following is another example if hover your mouse over a text it pops up an Ad

How to remove Text Enhance malware?

You will find many answers on the net for different browsers. Here are the procedures that worked for me.

For Google Chrome version 23.0.1271.95 m

Followed the steps on <http://text-enhance.com/optout.php>

For Internet Explorer version 9 .0.812.164211c

1. Open your IE9 browser
2. Click on ALT key if menu bar is not displayed
3. Click on tools, Manage Add-ons from the drop down menu.

4. On the "show" box select "All Ad-Ons"
5. On the right panel select "Shockware Flash Object" , right click and select disable,
6. Close the Ad-Ons window.
7. This fixed my Text Enhance issue.
